Software Engineering graduate with 2+ years in system administration, running the internal systems of a B2B company selling into the US. I manage Zoho, Odoo and MISA and train other departments to use them, and I developed and rolled out Shipstar, the internal system that automates order processing and reporting. Since 2026, I have been bringing AI into these workflows.

SKILLS

Business systems	Zoho CRM, Odoo, MISA, Shipstar; order flows from Shopee, TikTok Shop, Temu, Walmart
Programming & data	Python, TypeScript, Node.js, React, Next.js, SQL / PostgreSQL, Supabase, REST API, Excel
AI	Claude API, Claude Code, Codex, MCP
Web & analytics	WordPress, GA4, GTM, Looker Studio, Meta Ads, Google Ads
Languages	Vietnamese (native), English (intermediate)

EXPERIENCE

Digital Marketing & System Admin
03/2024 – Present

TP PLASTIC · Ho Chi Minh City · Full-time

> *A B2B plastics manufacturer selling to the US market. In charge of online marketing, the company websites and internal business systems.*

- Trained staff in accounting, content marketing, sales and customer service to use Zoho, Odoo and MISA.
- Managed customer and order data across Zoho, Odoo, MISA and Shipstar: lead intake, deduplication, sales pipeline stages and data cleanup.
- Set up a chatbot on tpplasticusa.com to take in and screen inquiries that arrive outside Vietnam business hours.
- Set up the company's first GTM, GA4 and Looker Studio reporting so the sales team could see which channel each order came from.
- Ran Meta and Google Ads at over $1,000/month, with lead conversion up 35%; built and ran 8 websites and 11 social media channels.

Product & Developer
06/2026 – 09/2026

SHIPSTAR · 3PL platform, Vietnam to US · alongside main role, team of 3

- Worked with the warehouse and dev teams to settle requirements, tested before each release, then trained each department to use the system.
- Built the automation that pulls orders from marketplaces, buys shipping labels in bulk and produces sales and per-marketplace P&L reports (fees, pre- and post-tax), reducing manual data entry.
- Redesigned receiving, order splitting, packing and per-carrier shipping-fee checks so warehouse staff can do them on a phone.
- Built an internal AI assistant that answers stock and order questions by querying system data (143 functions); any data change needs the user's confirmation.
- Used AI to read invoice photos and check totals for accounting, sort incoming email and draft replies for customer service, and write Shopee / TikTok Shop listings as drafts for staff to review.
- Wrote Python scripts that moved 8,684 MISA accounting records into Shipstar with zero variance; imported about 650 SKUs with dimensions, weight, price and stock by shelf location.
- Developed with Claude Code and Codex; 500+ commits.

Software Deployment Staff
06/2023 – 12/2023

NINA · Full-time

Turned client requirements into functional specs and deployed them; wrote deployment and rollback procedures for the team to share.

Front-end Developer
12/2022 – 03/2023

MYVINA · Internship

Built responsive interfaces from design files, plus reusable components.

Website Administrator
05/2022 – 10/2022

DEEP VIETNAM · Part-time

Managed website content, the CMS and user permissions.

PERSONAL PROJECTS

MIA Platform
09/2026 – 10/2026

Platform that sells and provisions AI assistants · solo

- Built the website, customer portal and admin; VietQR payments, with the AI assistant plan provisioned automatically once a customer pays.
- An API that lets outside AI agents (Claude Desktop, Claude Code) read admin data with read-only keys.

Fastify, Drizzle, PostgreSQL, React, Docker

MIA Agent
09/2026

Desktop AI assistant · with my mentor

Packaged and localised Hermes Agent (open source, by Nous Research) into a desktop app, and wrote Vietnamese documentation on how the agent works.

EstateHub CRM · multi-user CRM with a client pipeline and automatic follow-up reminders through browser notifications (Next.js, Supabase) 07/2026

Tinh Hoa · website selling and renting office equipment, with lead forms and automatic new-order emails 08/2026

EDUCATION

Bachelor of Software Engineering · Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT) 2019 – 2023
